## Introduction to GTC

GTC is a next-generation decentralized ecosystem designed to empower individuals and institutions through transparent, secure, and community-driven blockchain solutions. The goal of GTC is to create a unified digital economy that connects businesses, developers, and investors within a sustainable and rewarding environment.

# Vision and Mission

## Vision

To build a decentralized ecosystem where technology, trust, and transparency drive long-term growth and financial freedom for every participant.

## Mission

To revolutionize the blockchain economy by providing innovative solutions that bridge real-world applications and decentralized technology, ensuring mass adoption and long-term sustainability.

## Burning

A powerful burning system has been introduced to ensure long-term value growth and scarcity within the ecosystem. With every buy or sell transaction, 1% of the total amount is automatically burned, gradually reducing the overall supply and increasing the asset's stability over time.

**Less Supply. More Growth. Greater Value.**
